Congress Overview

An Invitation

Inaugurated in 1958, the World Mining Congress (WMC) is the leading international forum for the global mining and resources sectors. For the past 60 years WMC has been held triennially across the world. It presents a unique opportunity for international representatives of the world's leading resource economies to meet, find new partners, discuss challenges, and share research, technologies, and best practice.

Mining and resources have been a tremendous source of wealth and advancement, but with that comes tremendous responsibility.

At the core of everything we do must be our most precious resources – our people and our environment – and the sustainable and responsible practices that both preserve natural ecosystems and contribute to society.

There is potential for enormous future societal benefit for communities around the world, but to achieve this, we must bring the sector together under shared values of People, Environment and Production.

The 26th WMC will be held in Brisbane, Australia, 26 – 29 June 2023, hosted by Australia's national science agency, the CSIRO, and supported by government, industry, and academia.

This Congress will focus on Resourcing Tomorrow: Creating Value for Society. It will examine the world's future economic and social dependence on resources, considering issues like environmental sustainability, climate change, digital transformation, disruptive technologies, and our future workforce.

The Congress represents an exceptional opportunity for all organisations seeking engagement with the resources sector. Mining companies, investors, researchers, educators, regulators, suppliers, and operators from around the world will gather in Brisbane to benefit from insights and grow relationships.

We look forward to welcoming you to Australia and your participation in this premier international mining and resources event.

Congress Host

CSIRO is Australia's national science agency and one of the largest and most diverse research organisations in the world. We have 5,500 talented people working at more than 50 sites across Australia and internationally.

We are in the top 1% of global research institutions for 15 of 22 scientific discipline fields and in the top 0.1% for four fields including Geosciences and Environment & Ecology. Our world-renowned successes include WiFi, the Hendra vaccine and polymer banknotes.

CSIRO is a world leader in resource research, working in partnership with industry, government, OEMs, METS and universities in Australia and overseas, and delivers breakthrough innovation across the mining value chain.

We have a proud track record of industry innovation. Among CSIRO's many inventions, our sensing and automation technologies have removed mine workers from hazardous areas and resulted in significant increases in productivity.

Addressing industry's greatest challenges, CSIRO's research aims to benefit Australia and the world by growing the resource base, improving safety and productivity, and driving social and environmental performance through innovative science and technology.

Venue

The Brisbane Convention & Exhibition Centre has been judged one of the best in the world and has hosted premier events such as the G20 Leader's Summit for 7,000 delegates. It is located in Brisbane's acclaimed Southbank cultural precinct, immediately adjacent to the city's thriving CBD, an inner-city oasis of parklands, art galleries, museums, swimming lagoons and riverside restaurants and cafes.
